

# ABDULLAH ARMAN

B.Tech CSE Student | Machine Learning Enthusiast

7667053534 | armanabdullah178@gmail.com | [Linkedin](#) | [Github](#)

---

## PROFILE

Final year Computer Science Engineering student at Parul University with a strong foundation in Machine Learning, Android Development, and Core CS subjects (OS, DBMS, Computer Networks). Passionate about building real-world applications and currently developing problem-solving skills for technical interviews.

## EDUCATION

### Bachelor of Technology (B.Tech) – Computer Science and Engineering

Parul University | 2023 – 2027 CGPA: 8.01

## TECHNICAL SKILLS

- **Programming Languages:** Python, C++, Java
- **Machine Learning:** Logistic Regression, Supervised Learning, Feature Engineering, Model Evaluation, Data Preprocessing
- **Libraries & Tools:** Pandas, NumPy, Scikit-learn, Joblib
- **Web & API:** Flask, REST API Development
- **Mobile Development:** Android Studio, Java (Android), OkHttp
- **Database & Cloud:** SQL, AWS (EC2, S3), Cloud Deployment (Render)
- **Core CS:** Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks

## PROJECT

### STUDENT PERFORMANCE PREDICTION SYSTEM (*Machine Learning | Flask | Android | Cloud Deployment*) | [GitHub](#)

- Built an end-to-end student performance prediction system using **Logistic Regression** trained on UCI Student Performance Dataset, achieving **89.07% accuracy**
- Identified and resolved a **data leakage issue** where G3 was used as both input feature and target label — corrected feature engineering improved model credibility from 100% to realistic 89% accuracy
- Developed a **REST API using Flask** to serve real-time predictions, accepting student data (attendance, internal marks, assignment) and returning Pass/Fail result with confidence percentage
- Built a native **Android application** in Java that consumes the Flask API via HTTP, displaying prediction results with confidence score and risk level
- **Deployed the Flask backend on Render** (cloud platform), making the API publicly accessible at a live URL — eliminating local network dependency

## CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations
- NPTEL – Computer Networks and Internet Protocol (Elite)
- Advanced Software Engineering Job Simulation – Forage
- Solutions Architecture Job Simulation – Forage
